STARCKE®
ABRASIVES

Product Information
341XP

Grain Type	Zirconia & Aluminum Oxide Blend
Coating	Closed Coat
Backing	Heavy Poly-Cotton Mix. Emulsion & Oil Resistant
Form	Belts, Rolls and Cloth Discs
Grits	P24 – P120

Materials Aluminum, Wood and Steel

Application Examples

Aluminum

Wood

Steel

- Non-friable and tough Zirconia grain removes stock faster than regular Aluminum Oxide.
- Polyester-cotton makes a stronger and more flexible backing for easier installation and longer life.
- Generally usable twice as long as Aluminum Oxide for only 20% more in price.
